

## Specifications and Optional Extras

### Product Specifications:

Parameter	Resolution	Accuracy	Range
Carbon Monoxide (Infrared)	0.01%	±5% of reading *1 ±0.06% volume *1	0-10% Over-range 20%
Oxygen (Fuel Cell)	0.01%	±5% of reading *1 ±0.1% volume *1	0-21%
Hydrocarbon *2 (Infra Red)	1ppm	±5% of reading *1 ±12% volume *1	0-5,000ppm Over-range 20,000ppm
Carbon Dioxide (Infra Red)	0.1%	±5% of reading *1 ±0.5% volume *1	0-16% Over-range 20%
NOx *3 (Electro-Chemical)	1ppm	0-4,000ppm ±4% or 25ppm *1 4,000-5,000ppm ±8% *1	0-5,000ppm
Oil Temperature Optional: (only on some models)	1°C/F	±2°C ±0.3% of reading ±4°F ±0.3% of reading	0-150°C 32-302°F
RPM Optional: (only on some models)	1rpm	50rpm	200-6,000rpm
Lambda	0.001		0.8-1.2
AFR Petrol	0.01		11.76-17.64
AFR LPG			12.48-18.72

\*1 Using dry gases at STP \*2 Applies only to Petrol and LPG \*3 Applies to 5 Gas models only

Sensor Response T95 (Class 1)	15 Seconds
Pre-programmed Fuels	Petrol (Gasoline), LPG, CNG and Diesel
Dimensions Weight Handset Probe	1.1kg 220 x 55 x 120mm Insertion depth 350mm x Dia 15mm Clip handle to secure to exhaust, 4m long hose
Ambient Operating Range	+5°C to +45°C/10% to 90% RH non condensing
Storage Temperature	Minimum 0°C Maximum +50°C
Battery Charger	Input 110 Vac/230 Vac nominal Output 10 Vac off load
Analyser Battery Run Time	>4 hours from full charge with the pump running

### Optional Extras

KMIRP	Infrared Printer with thermal printer and AA batteries
KANE IMPRINT	Infrared Printer with standard paper roll and ink ribbon, supplied with rechargeable batteries, battery charger and 2 paper rolls
NOX4-1	NOx upgrade for Auto 4-1
NOX4-2	NOx upgrade for Auto 4-2
AUTOSWKIT	Auto software kit with CL3 lead for PC interface
14102/2	Laptop style carry case
17590	Metal Carry Case
EPAUTO3	High temp. EPAUTO2 probe with 17702 inline filter
EPAUTO5	High temp. probe with black hose
EPAUTO6	Motorbike Probe with emission temperature measurement

Auto 4-1 or Auto 5-1 Pro Kit

### Warranty

All Kane products are warranted from the date of purchase. This warranty covers any defects in materials or manufacturing and applies worldwide.

Kane Automotive is a division of Kane International Limited who specialise in the design and manufacture of electronic instruments for monitoring and optimising both energy usage and emissions from energy processes. Our Policy is to continuously develop and improve our products and so we reserve the right to change any part of our specifications without prior notice.

GAS ANALYSERS

*it's easy with Kane*

# Hand Held Exhaust Gas Analysers

Located in the United Kingdom, Kane International Ltd specialise in the design and manufacture of electronic instruments for monitoring and optimising both energy usage and emissions from energy processes.

The Kane Auto 4 & 5 Series Exhaust Gas Analysers are truly portable that set new standards of convenience and ease of use. Weighing just 1Kg, the handset fits comfortably in the hand and can run for up to 4 hours on its internal re-chargeable battery. A multi-functional gas analyser ideal for emission diagnostics, tuning, pre-compliance testing and for regulated testing where OIML R99 Class 1 standards are specified.

The programmed re-calibration procedure permits low cost servicing either on site or at approved service facilities. The O2 and NO sensors are warranted for 2 years from date of purchase. Each analyser is pre-programmed with five language options from a current choice of 10 European languages.

## 2 Measures

Carbon Monoxide, Hydrocarbons, Carbon Dioxide and Oxygen. Nitrogen Oxides measurement is available on 5 gas models and can be fitted retrospectively to 4 gas models.

## 1 So easy to use

Once the analyser has been set-up, there is no need for daily setting or configuration. As a truly portable analyser, you decide where to test. Using the multi fuel selection mode, you can choose between Petrol (Gasoline), LPG, CNG, and Diesel settings.

## 7 Long life battery

A fully charged battery has the capacity to allow the analyser to be used all day without the need to recharge. The battery can be charged via the mains or a vehicles 12 volt battery.

## 8 Additional features

Lambda/AFR measurement  
Corrected CO  
RPM and Oil/Exhaust gas temperature measurements  
Multi lingual software.

## 4 Full Infra Red Measuring Bench

Unlike some portables which calculate CO2 the infra red gas measuring bench measures all three infra red gases (CO, HC and CO2) to give true 4 or 5 gas capability. Oxygen and NOx are measured using automotive electrochemical sensors.

## 3 Fast start up

The analyser is ready to go in just 150 seconds from first power on. Re-zeroing takes just 30 seconds.

## 9 Nitrogen Oxides (NOx) Testing

The testing of Nitrogen Oxides is becoming more relevant. In order to achieve a "NOx" reading the vehicle being tested needs to be under a load. This would normally involve using a dynamometer or taking your gas analyser with you on a road test. With a Kane hand held analyser this is a simple and easy operation. The built in "Auto store" facility will automatically take and store up to 255 tests that can be recalled, printed and analysed at a later date.

## 5 Logging and Auto-Logging

The analyser can store up to 255 sets of full test results in its internal memory. Test results can be recorded manually by the press of a key, or automatically timed so that during a drive test no driver intervention is required. They can then be downloaded to a PC (using optional software).

## 6 PC compatible

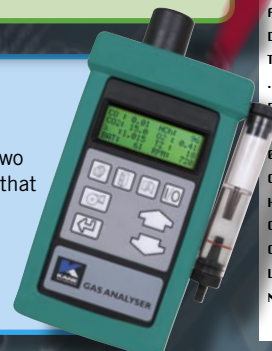

The analyser also provides an RS232 output so that using optional PC software, data can be displayed on a PC screen and the PC's printer can be used to produce high quality test reports.

## 10 Portable Printers - KMIRP and KANE IMPRINT

The analyser includes an integral IR transmitter that is compatible with two infrared battery powered printers so that results can be recorded anywhere.

**KMIRP** Uses thermal paper.

**IMPRINT** Uses standard paper roll and ink ribbon.

AUTO 5-1			
DATE		15-07-05	
TIME		10:19:26	
		FUEL	PETROL
O2	%		0.74
CO2	%		13.4
HC	ppm		08
CO	%		0.43
COK	%		0.46
Lambda			1.027
NOx	ppm		183

## Kane Hand Held Exhaust Gas Analyser Range

Product Selection:				
	OIML CLASS 1		Standard	
	Auto 5-1	Auto 4-1	Auto 5-2	Auto 4-2
Measured Gases	CO/CO <sub>2</sub> /O <sub>2</sub> /HC/NO <sub>x</sub>	CO/CO <sub>2</sub> /O <sub>2</sub> /HC	CO/CO <sub>2</sub> /O <sub>2</sub> /HC/NO <sub>x</sub>	CO/CO <sub>2</sub> /O <sub>2</sub> /HC
OIML Class 1 Certificate	✓	✓	Class 1 Accuracy	Class 1 Accuracy

Carry Case - Laptop style softcase	✓	✓	✓	✓
Exhaust Probe - Stainless Steel	✓	✓	✓	✓

\*HC is not displayed in diesel mode

## Gas Analyser as a Diagnostic Tool

Using the gas analyser as a diagnostic tool enhances its use. Some key faults that have an effect on gas emissions are listed in the table below.

1. Rich mixture
2. Weak Mixture
3. Ignition Missfire
4. Fuel Mis-magagement
5. Tight Valve Clearance
6. Incorrect Ignition Timing
7. Incorrect Valve Timing
8. Faulty Catalytic Convertor

In a busy multi-bay workshop there is no need to shuffle vehicles around to get them close to the 'big-box' analyser. Vehicles can even be tested outside on the forecourt and for difficult intermittent faults, exhaust gases can be sampled whilst the vehicle is being driven. This makes the analyser ideal for all types of repair, either in a workshop or mobile.

## OIML R99 Class 1 Analysers

The Auto 4-1 and Auto 5-1 series have been certified to be compliant with OIML R99 Class 1 (ISO 3930), under Test Report No N0356 of January 2001 issued by the duly authorised and approved OIML test body SIRA Test and Certification Ltd of the UK.

Compliance to OIML standards is often a requirement for regulated emission testing programmes around the world. Each analyser is supplied with a fully traceable calibration certificate.

## References from around the world

- Active Kane brand distribution network around the world
- Approved supplier to the FORD Group under the European EQS programme and Perusahaan Otomobil Nasional Berhad (PROTON) of Malaysia
- Supplier to several major OEM's operating in the Automotive Aftermarket for tools and Equipment
- Supplier to the Republic of the Philippines Department of Transportation & Communications with reference to the Implementation of Clean Air Act (CAA) Rules and Regulations
- Supplier for the Vehicle Emissions Testing (VET) component of the Cairo Air Improvements Project (CAIP), Cairo, Egypt
- Supplier to the Department of Land Transportation, Bangkok, Thailand
- Major supplier to Motorbike and Off-The-Road Vehicle workshops
